

# LOCAL WATER DONE WELL

# FREQUENTLY ASKED QUESTIONS

## WHAT IS LOCAL WATER DONE WELL?

Central government has passed legislation which requires Councils to identify and consult on options for the future delivery of water services. It replaces the previous government's Three Water proposals and gives councils flexibility to determine for themselves the most suitable arrangement for the delivery of water services (drinking water, wastewater and stormwater – the “three waters”) for their communities.

## WHAT IS COUNCIL'S PREFERRED OPTION?

To create a joint Water Services Council-Controlled Organisation (WSCCO), owned by the Hurunui District Council and Kaikoura District Council for the delivery of water services to both districts.

## WHO WOULD OWN THE DISTRICT'S WATER, STORMWATER AND SEWERAGE ASSETS?

These would be transferred to the new joint WSCCO, which would also be responsible for the debt incurred in developing water and sewer infrastructure. The assets will continue to be used to support the communities which currently benefit from them.

## COULD THE PROPOSED JOINT CCO SELL OFF HURUNUI'S WATER ASSETS?

The Local Government Water Services Bill does not allow privatisation.

## WHY IS COUNCIL PROPOSING THIS OPTION?

Councils will adopt different structures for water services delivery based on their particular circumstances. Hurunui District Council has over a number of years undertaken major upgrades to its water infrastructure and this has positioned the district well for the future. The proposed model provides the best mitigation against future long term tariff increases for consumers and ensures professional governance for this important community infrastructure.

## WOULD THE COST OF WATER AND SEWERAGE GO UP?

Costs of water and sewerage will go up under all the options to meet a new legislative requirement to ensure revenue can sustain long-term investment in water services.

## WHEN CAN I HAVE MY SAY?
