

# REDUCE WASTE *On Camp*

## AIM TO REDUCE WASTE ON CAMP

Check what recycling and waste facilities are available at the campsite. e.g. is there composting?

Plan your meals and ingredients before heading to the supermarket or asking parents to make and prepare meals. Try not to over-cater as this creates a large mass of food waste.

Don't use disposable cutlery, plates, and cups. If the facilities don't provide, they can bring their own from home. Make a roster for dishes and clean-up duties.

Packed Lunches – Use beeswax wraps for packed lunches and reusable water bottles

Make sure ingredients are in recyclable packaging and buy in bulk to reduce packaging.

When at camp get the class to take note of the recycling area and bins and read and look at the pictures as districts can have different recycling rules and guidelines
